

**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA**

Application of San Diego Gas & Electric
Company (U 902 E) for Authority to Update Electric Rate
Design Effective on January 1, 2015

Application 14-01-027
(Filed January 31, 2014)

Application 14-01-027
Exhibit No.: (SDG&E-____)

**REVISED PREPARED DIRECT TESTIMONY OF
CYNTHIA FANG
CHAPTER 2
ON BEHALF OF SAN DIEGO GAS & ELECTRIC COMPANY**

**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA**

February 24, 2014

1 **REVISED PREPARED DIRECT TESTIMONY OF**
2 **CYNTHIA FANG**
3 **(CHAPTER 2)**

4 **I. OVERVIEW AND PURPOSE**

5 This Rate Design Window (“RDW”) Application presents San Diego Gas & Electric
6 Company’s (“SDG&E’s”) request to update its electric rate design effective January 1, 2015.

7 My testimony will:

- 8 • discuss how SDG&E’s rate design proposals relate to other rate-related
9 proceedings, specifically (1) the California Public Utilities Commission’s
10 (“Commission’s”) recent decision (“D.”) 14-01-002 in SDG&E’s 2012 General
11 Rate Case Phase 2 (“2012 GRC P2”) Application (“A.”) 11-10-002 and (2) recent
12 development in the Order Instituting Rulemaking (“OIR”) on the Commission’s
13 Own Motion to Conduct a Comprehensive Examination of Investor Owned
14 Electric Utilities’ Residential Rate Structures, the Transition to Time Varying and
15 Dynamic Rates, and Other Statutory Obligations (Rulemaking (“R.”) 12-06-013)
16 (“Residential Rate OIR”);
- 17 • present SDG&E’s proposal to reduce its residential baseline allowance to the
18 minimum level allowed by statute¹, and thereby reduce rate pressure on upper tier
19 customers;
- 20 • present SDG&E’s rates reflecting its proposal to update Time of Use (“TOU”)
21 periods presented in the testimony of SDG&E witness David T. Barker (Chapter
22 3) and timing of mandatory and default non-residential rate offerings;
- 23 • present SDG&E’s proposal to reduce Peak-Time-Rebate (“PTR”) incentives;

¹ California Public Utilities Code (“P.U. Code”) § 739.

- present SDG&E's proposal to move recovery of California Solar Initiative (“CSI”) and Self-Generation Incentive Program (“SGIP”) costs from distribution rates to Public Purpose Program (“PPP”) rates consistent with other programs funding state policy objectives;
- present SDG&E's rates reflecting updates for 2015 Test Year (“TY”) forecast sales as presented in the testimony of SDG&E witness Kenneth E. Schiermeyer (Chapter 4); and
- present SDG&E's proposal for the timing of rate design implementation, with a start date effective January 1, 2015.

SDG&E's electric rates are comprised of the following components: (1) Transmission², (2) Distribution³, (3) PPP⁴, (4) Nuclear Decommissioning (“ND”)⁵, (5) Ongoing Competition Transition Charges (“CTC”)⁶, (6) Reliability Services (“RS”)⁷, (7) the Total Rate Adjustment Component (“TRAC”)⁸, (8) Department of Water Resources Bond Charge (“DWR-BC”)⁹, and (9) Commodity¹⁰ (see Attachment A for more details on SDG&E's current rate offerings). In this proceeding, SDG&E proposes rate design changes limited (1) to the re-definition of TOU periods, which will impact Commodity rates, and (2) to residential tiered rates resulting from the proposed reduction in baseline. No changes are proposed for CTC, ND and DWR-BC rate components. In addition, while no changes are proposed at this time for Transmission and RS rates that are subject to Federal Energy Regulatory Commission (“FERC”) jurisdiction, SDG&E

² Transmission – charges for costs to deliver high-voltage electricity from power plants to distribution system.

³ Distribution – charges for costs to distribute electricity to customer premises.

⁴ PPP – charges to pay for state-mandated programs such as low-income and energy efficiency programs.

⁵ ND – charges to pay for the retirement of nuclear power plants.

⁶ CTC – charges to pay the above market costs for long-term power contracts.

⁷ RS – charges for services provided by generating facilities to maintain system reliability.

⁸ TRAC – charges/credits applied to handle the capping of residential tiered rate pursuant to Assembly Bill (“AB” 1X and Senate Bill (“SB”)) 695.

⁹ DWR-BC – charges to pay bonds issued by DWR to cover of cost of purchasing power during the 2000/2001 electricity crisis.

¹⁰ Commodity – charges for electricity which includes charges for energy provided by SDG&E and DWR.

1 will address TOU periods for FERC jurisdictional rates at FERC. In addition, while no structural
2 changes are being proposed for Distribution and TRAC, Distribution rate levels will change
3 because of the proposal to move recovery of CSI and SGIP costs from Distribution rates to PPP
4 rates and TRAC rate levels will change as a result of SDG&E's rate design proposals in this
5 proceeding. Finally, the rate design proposals and customer bill impacts presented in this filing
6 are compared against rates effective January 1, 2014,¹¹ and the proposed revenues and rate levels
7 are revenue-neutral to current effective rates on a system level.^{12 13}

8 My testimony is organized as follows:

9 **Section II – Relationship to Other Rate-Related Proceedings:** describes issues
10 addressed and adopted in D.14-01-002 (SDG&E's 2012 GRC P2 proceeding) and
11 SDG&E's proposals in the Residential Rate OIR (R.12-06-013) now permitted under
12 Assembly Bill ("AB") 327;

13 **Section III – Residential Baseline Quantity Reductions:** presents the proposal to
14 reduce SDG&E baseline allowances to the legislative minimums;

15 **Section IV – TOU Period Changes:** presents the proposal to change the TOU
16 periods for all SDG&E TOU rate schedules as well as the timing of mandatory and
17 default time-variant rates;

18 **Section V – Reducing PTR Incentives:** presents the proposal to reduce PTR
19 incentive levels by \$0.25/kWh to \$0.50/kWh for customers without enabling
20 technology and to \$1.00/kWh for customers with enabling technology;

¹¹ SDG&E Advice Letter ("AL") 2564-E.

¹² Slight differences in the presentation of class average rates or revenues are due to present revenues being calculated based on current rates and proposed sales, whereas proposed rates are developed off of present revenues using proposed sales.

¹³ On February 1, 2014, SDG&E will implement changes to residential tiered non-CARE and CARE rates, specifically increases to Tier 1 and 2 rates previously permitted under SB 695 (SDG&E AL 2568-E).

1 **Section VI – Recovery of CSI and SGIP Costs:** presents the proposal to move
2 recovery of CSI and SGIP costs from distribution rates to PPP rates consistent with
3 the recovery of other funding programs for state policy initiatives;

4 **Section VII – Summary and Conclusion:** provides a summary of recommendations;
5 and

6 **Section VIII – Statement of Qualifications:** presents my qualifications.

7 My testimony also contains the following attachments:

- 8 • **Attachment A – Present Rates:** presents the current SDG&E electric rates
9 effective January 1, 2014;
- 10 • **Attachment B – Proposed Rates for 2015:** presents the proposed electric
11 rates based on the proposals in this proceeding;
- 12 • **Attachment C – Illustrative Bill Impacts for 2015:** presents illustrative bill
13 impacts based on the proposed electric rates identified in Attachment B;
- 14 • **Attachment D – Comparisons of Present and Proposed Commodity
15 Rates:** presents a comparison of present and proposed electric commodity
16 rates and includes a comparison of TOU period definitions, including dynamic
17 pricing rates;
- 18 • **Attachment E – Comparison of Present and Proposed Total Rates:**
19 presents a comparison of present and proposed total electric rates;
- 20 • **Attachment F – Proposed Street Lighting Rates:** presents the proposed
21 street lighting rates based on the proposals in this proceeding; and
- 22 • **Attachment G – Baseline Study:** describes the development of the proposed
23 baseline allowances to the legislative minimum levels.

1 **II. RELATIONSHIP TO OTHER RATE-RELATED PROCEEDINGS**

2 **A. SDG&E's 2012 GRC P2**

3 On January 16, 2014, the Commission adopted D.14-01-002 approving SDG&E's 2012
4 GRC P2. SDG&E's 2012 GRC P2 was initially filed October 3, 2011, and addressed the
5 traditional elements of a GRC P2 proceeding as described below:

- 6 • Marginal Cost Studies:
 - 7 ○ Marginal Distribution Costs (Marginal Customer and Marginal Distribution
8 Demand Costs); and
 - 9 ○ Marginal Commodity Costs (Marginal Energy and Marginal Capacity Generation
10 Costs);
- 11 • Revenue Allocation (Distribution, Commodity, and CTC); and
- 12 • Rate Design.

13 D.14-01-002 approved the following:

- 14 • The October 5, 2012 Revenue Allocation and Rate Design Settlement ("October 5,
15 2012 Settlement") is approved;
- 16 • The October 19, 2012 Medium and Large Commercial ("M/L C&I") and Industrial
17 Distribution Demand Charge Settlement is rejected;
- 18 • SDG&E's proposal for a residential basic service fee ("BSF") is denied without
19 prejudice;
- 20 • SDG&E's proposal to consolidate residential Tier 3 and Tier 4 rates is denied without
21 prejudice;
- 22 • SDG&E's proposed removal of the California Alternate Rates for Energy ("CARE")
23 Tier 3 Rate Cap adopted in D.09-09-036 is denied without prejudice;
- 24 • SDG&E's existing CARE Cost Allocation is modified;
- 25 • SDG&E's Proposed Prepay Program is denied; and
- 26 • SDG&E's uncontested proposals are approved.

As described below, the October 5 Settlement, modification to existing CARE Cost Allocation, and approved uncontested proposals pursuant to D.14-01-002 will impact some of the rate design proposals presented in this RDW Application.

- D.14-01-002 approved the October 5, 2012 Settlement, thereby approving the following:
 - (1) Revenue allocation related to Distribution, Commodity and CTC;
 - (2) Treatment of Rate Schedule PA-T-1;¹⁴
 - (3) Rate design for small commercial customers;
 - (4) Rate design for agricultural customers; and,
 - (5) Certain rate design items for M/L C&I customers, specifically BSF and rate design related to Schedule A6-TOU¹⁵ and Secondary Substation, Primary Substation, and Transmission service voltage levels as well as Dynamic Pricing rate design.

Item (5) includes the implementation of year 2 of BSF increases which are reflected in the rates presented in this proceeding.¹⁶

- Regarding the CARE Cost Allocation, these customers currently receive subsidies resulting from lower tiered rates than non-CARE customers that are in addition to a 20% line item discount and exemptions that result in a CARE discount greater than the current range of 30-35% legislated under AB 327. These CARE rate subsidies are currently paid by non-CARE residential customers. The

¹⁴ Schedule PA-T-1, Experimental Power - Agricultural - Optional Time-Of-Use: optionally available, on an experimental basis, to agricultural and water pumping customers whose maximum monthly demand is expected to be above 500 kW and who are classified with one or more of the North American Industry Classification (NAICS) Codes identified in the tariff. This schedule is also available to those agricultural and water pumping customers whose maximum demand is less than 500 kW who are installing or have installed facilities or procedures to reduce their annual on-peak energy consumption by 1,500 kWhs and are also classified by the one of the identified NAICS Codes.

¹⁵ Schedule A6-TOU, General Service – Time Metered Optional: optionally available to customers receiving service at Primary, Primary Substation, or Transmission service voltage level, as defined in Rule 1, whose maximum demand in any time period is 500 kW or greater.

¹⁶ Rate schedules impacted by this change secondary and transmission level service on the following schedules: AD, AL-TOU, DG-R, AY-TOU, and OL-TOU. A compensating adjustment in the distribution demand charges occurs to ensure revenue neutrality within the class.

Commission in D.14-01-002 also ordered that SDG&E change its current allocation of CARE rate subsidies, to be paid for in a manner consistent with the recovery for the 20% line item discount, that is all non-CARE customers,¹⁷ not just residential non-CARE customers, pay for these costs.

- Among the uncontested issues was the rate design for Schedule A-TOU which includes the implementation of year 2 of BSF increases which are reflected in the rates presented in this proceeding. A compensating adjustment in the distribution energy charges occurs to ensure revenue neutrality within the class.

Implementation of D.14-01-002 also includes the TOU and Dynamic Pricing rate options for residential and small non-residential customers associated with A.10-07-009 (Application of San Diego Gas & Electric Company (U 902 E) for Approval of Its Proposals For Dynamic Pricing and Recovery Of Incremental Expenditures Required For Implementation). Pursuant to D.12-12-004, these are customers who use less than 20 kW.

B. Residential Rate OIR

The Residential Rate OIR (R.12-06-013), initiated in June of 2012, was instituted to examine current residential electric rate design, including the tier structure in effect for residential customers, the state of time variant and dynamic pricing, potential pathways from tiers to time variant and dynamic pricing, and preferable residential rate design to be implemented when statutory restrictions are lifted. The November 11, 2012 Ruling in that proceeding set forth ten Principles for evaluating Optimal Rate Design, including that rates should be based on marginal cost (Principle 2) and on cost-causation principles (Principle 3) and that rates should generally avoid cross-subsidies, unless the cross-subsidies appropriately support explicit state policy goals (Principle 7) and, in the event incentives are determined necessary to

¹⁷ Lighting customers are currently excluded.

1 support state policy goals, incentives should be explicit and transparent (Principle 8). SDG&E
2 submitted its proposal for an Optimal Rate Design identifying that an optimal rate design is one
3 that meets the following criteria:

- 4 • Utilities charge for the services they provide;
- 5 • Rates are designed to recover costs on the same basis as they are incurred; and
- 6 • Incentives or subsidies that have been deemed necessary to further public policy
7 objectives are separately and transparently identified and charged to customers in a fair
8 manner.¹⁸

9 On Oct. 7, 2013 Governor Brown signed into law the rate reform measure Assembly Bill
10 AB 327. Among other things, AB 327 repealed the rate increase limits imposed by SB 695,

11 including limitations applicable to CARE rates, and added provisions giving the Commission
12 authority to increase electric rates so long as such changes are “reasonable and subject to a

13 reasonable phase-in schedule relative to rates and charges in effect prior to January 1, 2014.”¹⁹

14 Following the passage of AB 327, on November 22, 2013, SDG&E filed its Supplemental Filing
15 for Interim Rate Relief to implement residential tiered rate reform and CARE reform now
16 permitted under AB 327, as directed by Assigned Commissioner Ruling (“ACR”) issued October
17 25, 2013.

18 As the Residential Rate OIR further evolved, on January 6, 2014, Commissioner
19 President Peevey issued an Amended Scoping Memo and Ruling stating that the Residential Rate
20 OIR would proceed as a two-phased ratesetting proceeding. Phase 1 will cover the longer-term
21 (post-2014) rate design proposals that could apply generally to each of the investor-owned-
22 utilities (“IOUs”) as they move toward mandatory residential TOU rates beginning in 2018.
23 Phase 2 will cover the shorter-term, interim rate design proposals that could be implemented by

¹⁸ Residential Rate Design Proposal of San Diego Gas & Electric Company (U902M) in Response to the Ruling of Administrative Law Judge (“ALJ”) Mckinney and Scoping Memo and Ruling of Assigned Commissioner, p. 2.

¹⁹ P.U. Code § 739.9(b).

1 summer of 2014 and offer more immediate rate relief for upper tier customers. Accordingly, on
2 January 28, 2014, consistent with Administrative Law Judge (“ALJ”) direction and the Second
3 Amended Scoping Memo issued January 24, 2014, SDG&E re-filed its Supplemental Filing for
4 Interim Rate Relief with simplified rate design proposals that still retained the current 4-tiered
5 rate structure.

6 Since the overall structure of residential rates under AB 327 is still to be addressed
7 before the Commission in the Residential Rate OIR, the residential rates presented in this RDW
8 Application continue to reflect the current effective structure, which still reflects the SB 695
9 legislative constraints. Upon resolution and final adoption of new residential rate structures in
10 the Residential Rate OIR, SDG&E will update rates in this proceeding to reflect such decisions.

11 **III. RESIDENTIAL BASELINE QUANTITY REDUCTIONS**

12 SDG&E’s current standard residential rate design is a 4-tiered capped rate structure, with
13 caps to Tiers 1 and 2 that, until the passage of AB 327, were subject to legislative constraints
14 under AB 1X and SB 695. Each tiered rate is applied to usage based on a baseline reference,
15 specifically:

- 16 • Tier 1 rates apply to usage up to 100% of baseline;
- 17 • Tier 2 rates apply to usage above 100% of baseline up to 130% of baseline;
- 18 • Tier 3 rates apply to usage above 130% of baseline and up to 200% of baseline;
19 and
- 20 • Tier 4 rates apply to usage above 200% of baseline.

21 Residential baseline varies by:

- 22 • Climate zone - SDG&E has four climate zones: Coastal/Inland/Mountain/Desert;
- 23 • Seasons - SDG&E’s seasons are defined as: Summer months from May to
24 October with Winter months from November to April; and

- 1 • Service type: Basic/All Electric.²⁰

2 Baseline is the quantity of electricity “which is necessary to supply a significant portion
3 of the reasonable energy needs of the average residential customer.”²¹ SDG&E’s current
4 baseline allowance quantities were established in its 2009 RDW Application (A.08-11-014),
5 pursuant to D.09-09-036 and implemented by SDG&E in Advice Letter (“AL”) 2115-E,
6 effective January 1, 2010. By statute, baseline is defined as “a quantity of electricity or gas
7 allocated by the commission for residential customers based on from 50 to 60 percent of average
8 residential consumption of these commodities, except that, for residential gas customers and for
9 all-electric residential customers, the baseline quantity shall be established at from 60 to 70
10 percent of average residential consumption during the winter heating season.”²² The
11 establishment of baseline takes into account climate and seasonal variations.

12 **A. Residential Impact**

13 In this proceeding, SDG&E proposes to reduce its current baseline levels to the legislated
14 minimum levels based on the study presented in Attachment G. SDG&E does not propose any
15 other changes to residential tiered rates in this proceeding. Table CF-1 presents SDG&E’s
16 currently effective and legislated minimum baseline and Table CF-2 provides a comparison of
17 current and legislated minimum baseline.²³

²⁰ All Electric allowances are available upon application to those customers who have permanently installed space heating or who have electric water heating and receive no energy from another source.

²¹ P.U. Code § 739 (b).

²² P.U. Code § 739 (a)(1).

²³ Schedule DM has separate baseline allowances as identified in Attachment G.

Table CF-1: Current and Legislated Minimum Baseline

Season	Service Type	Climate Zone	Legislated Minimum Baseline Allowance (kWh/day)	Legislated Minimum Baseline Percentage (% of Usage)	Current Baseline Allowance (kWh/day)	Current Baseline Percentage (% of Usage)
Summer	Basic	Coastal	9.0	50%	9.6	52%
		Inland	10.4	50%	11.2	53%
		Mountain	13.6	50%	14.8	53%
		Desert	15.9	50%	16.4	54%
	All-Electric	Coastal	6.0	50%	9.8	70%
		Inland	8.7	50%	11.0	59%
		Mountain	15.2	50%	17.3	56%
		Desert	17.0	50%	19.5	59%
Winter	Basic	Coastal	9.2	50%	10.1	54%
		Inland	9.6	50%	10.8	55%
		Mountain	12.9	50%	13.8	53%
		Desert	10.9	50%	11.2	55%
	All-Electric	Coastal	8.8	60%	16.6	83%
		Inland	12.2	60%	18.3	74%
		Mountain	22.1	60%	28.5	71%
		Desert	17.1	60%	22.0	75%

1 **Table CF-2: Comparison of Current and Legislated Minimum Baseline**

Season	Service Type	Climate Zone	Current Baseline Allowance (kWh/day)	Legislated Minimum Baseline Allowance (kWh/day)	Change From Current (%)
Summer	Basic	Coastal	9.6	9.0	7%
		Inland	11.2	10.4	8%
		Mountain	14.8	13.6	9%
		Desert	16.4	15.9	3%
	All-Electric	Coastal	9.8	6.0	62%
		Inland	11.0	8.7	26%
		Mountain	17.3	15.2	14%
		Desert	19.5	17.0	15%
Winter	Basic	Coastal	10.1	9.2	10%
		Inland	10.8	9.6	13%
		Mountain	13.8	12.9	7%
		Desert	11.2	10.9	3%
	All-Electric	Coastal	16.6	8.8	89%
		Inland	18.3	12.2	50%
		Mountain	28.5	22.1	29%
		Desert	22.0	17.1	29%

2 For Basic service, moving from current baseline amounts to the legislated minimum
 3 baseline amounts results in reductions to residential baseline allowances ranging between 3-13%
 4 across the different climate zones and seasons. For All-Electric service, moving to the legislative
 5 minimum baseline amounts results in steeper allowance reductions across climate zones, ranging
 6 between 29-89% in winter and 14-62% in summer.

1 Recognizing the potential bill impacts of moving directly to the legislated minimum
2 baseline for customers with All-Electric service, SDG&E proposes to move to legislated
3 minimum baseline amounts for All-Electric service in 5 steps over a 5 year period. Table CF-3
4 presents SDG&E's proposed transition for All-Electric service baseline to decrease to the
5 legislated minimum.

7 **Table CF-3: SDG&E Proposal - 5-Year Phase-In All-Electric Baseline Values**

Season	Climate Zone	Proposed 5-year Phase-in				
		1st-year	2nd-year	3rd-year	4th-year	5th-year
		kWh/day	kWh/day	kWh/day	kWh/day	kWh/day
Standard All-Electric						
Summer	Coastal	9.0	8.3	7.5	6.8	6.0
	Inland	10.6	10.1	9.6	9.2	8.7
	Mountain	16.9	16.5	16.0	15.6	15.2
	Desert	19.0	18.5	18.0	17.5	17.0
Winter	Coastal	15.0	13.5	11.9	10.4	8.8
	Inland	17.1	15.8	14.6	13.4	12.2
	Mountain	27.2	26.0	24.7	23.4	22.1
	Desert	21.0	20.0	19.1	18.1	17.1
Schedule DM All-Electric						
Summer	Coastal	4.5	4.2	3.8	3.4	3.0
	Inland	5.3	5.1	4.9	4.6	4.4
	Mountain	8.5	8.3	8.1	7.9	7.6
	Desert	12.4	12.1	11.8	11.4	11.1
Winter	Coastal	8.4	7.5	6.6	5.8	4.9
	Inland	9.5	8.8	8.2	7.5	6.8
	Mountain	15.2	14.5	13.8	13.1	12.4
	Desert	13.3	12.7	12.1	11.4	10.8

8

9 **B. Non-Residential CARE Impact**

10 In addition to the impact on residential tiered rates, SDG&E's baseline proposal will also
11 impact non-residential customers on CARE, also known as Expanded CARE customers. In
12 addition to exemptions from DWR-BC, CSI, and the CARE surcharge, and in addition to the

1 benefit of a 20% line item bill discount, Expanded CARE customers receive additional rate
2 subsidies in the form of a reduced flat commodity rate (E-LI commodity rate) rather than the
3 otherwise applicable TOU energy rate,²⁴ pursuant to Commission Resolution E-3907. The
4 reduction in residential baseline levels will increase the commodity rates for Expanded CARE
5 customers. The EL-I commodity energy rate for Expanded CARE customers reflects the
6 residential commodity rate less the weighted average of CARE TRAC rates in order to provide
7 these non-residential customers with similar rate protection afforded to residential CARE
8 customers pursuant to AB1X through the TRAC rate component. The reduction in baseline
9 levels will change TRAC rates resulting in lower commodity rate subsidies for Expanded CARE
10 customers.

11 AB 327 requires that, “[t]he average effective CARE discount shall not be less
12 than 30 percent or more than 35 percent of the revenues that would have been produced for the
13 same billed usage by non-CARE customers.”²⁵ In addition, AB 327 specifies that:

14 If an electrical corporation provides an average effective CARE discount in
15 excess of the maximum percentage specified in paragraph (1), the electrical
16 corporation shall not reduce, on an annual basis, the average effective CARE
17 discount by more than a reasonable percentage decrease below the discount in
18 effect on January 1, 2013, or that the electrical corporation had been authorized to
19 place in effect by that date;²⁶ and

20 The entire discount shall be provided in the form of a reduction in the overall bill
21 for the eligible CARE customer.²⁷

22
23 SDG&E does not address any changes to the discount structure for Expanded CARE customers
24 in this proceeding. SDG&E will be addressing CARE reform under AB 327, including
25 Expanded CARE in Phase 1 of the Residential Rate OIR, described above.

²⁴ Expanded CARE customers still pay commodity peak demand charges associated with their otherwise applicable rate.

²⁵ P.U. Code § 739.1(c)(1), as amended by AB 327.

²⁶ P.U. Code § 739.1(c)(2), as amended by AB 327.

²⁷ P.U. Code § 739.1(c)(3), as amended by AB 327.

1 **IV. TOU PERIOD CHANGES**

2 In this proceeding, SDG&E proposes to change the TOU periods for all TOU rates as
3 addressed in the prepared direct testimony of SDG&E witnesses Chris Yunker (Chapter 1) and
4 David T. Barker (Chapter 3).

5 As identified in Table DTB-1 of Mr. Barker's testimony, SDG&E currently has rate
6 schedules with different TOU periods. SDG&E proposes to change the TOU periods for all rates
7 schedules, presented below in Table CF-4, to one consistent set of on-peak, semi-peak, and off-
8 peak periods, with the former off-peak now a super off-peak period previously only available to
9 electric vehicle ("EV") rates, as addressed in Mr. Barker's testimony and shown below, to
10 provide customers with the same price signals to guide consumption and demand response
11 decisions. Attachment D presents a comparison of present and proposed commodity rates and
12 TOU period definitions.

13 **Table CF-4: Proposed TOU periods**

Summer (May - October)		
	Weekdays	Weekends/Holidays
On-Peak	2pm To 9pm	N/A
Semi-Peak	6am To 2pm And 9pm to 12m	6am to 12m
Super Off-Peak	12m To 6am	12m to 6am

Winter (November - April)		
	Weekdays	Weekends/Holidays
On-Peak	5pm To 9pm	N/A
Semi-Peak	6am To 5pm And 9pm to 12m	6am to 12m
Super Off-Peak	12m To 6am	12m to 6am

14 Additionally, with the proposed change to the on-peak period, SDG&E proposes to change the
15 event period associated with dynamic pricing offerings from the current 11 a.m. to 6 p.m. year-
16 round to 2 p.m. to 6 p.m. year-round. SDG&E's dynamic pricing rates charge customers a
17

1 dynamic pricing adder²⁸ (i.e., and incremental price in addition to their otherwise applicable
2 TOU energy rate). The proposed TOU period change will result in a proportional increase to the
3 adder price equivalent to the reduction in hours. Specifically, this would change the event
4 periods for:

- 5 • Default Critical Peak Pricing (“CPP-D”) applicable to M/L C&I;
- 6 • Dynamic pricing offerings available to small non-residential and residential customers;
and
- 8 • PTR available to residential customers.

9 The implications of the proposed TOU change to specific customer rate schedules are
10 identified below.

11 **A. Medium and Large Commercial and Industrial (“M/L C&I”)**

12 SDG&E’s rate schedules available for its M/L C&I customers are as follows:

- 13 • Schedule AD, General Service – Demand Metered (Closed Schedule after 6/30/1987):²⁹
14 applicable to general service of non-residential customers whose monthly maximum
15 demand is not less than 20 kW or more than 500 kW for three consecutive months.
- 16 • Schedule AL-TOU, General Service – Time Metered:³⁰ applicable to all metered non-
17 residential customers whose monthly maximum demand equals, exceeds, or is expected
18 to equal or exceed 20 kW for three consecutive months. This is SDG&E’s standard
19 schedule for M/L C&I.

²⁸ For CPP-D customers, this is identified as a CPP Adder. For residential and small non-residential, this is identified as a Reduce Your Use (“RYU”) Adder.

²⁹ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_AD.pdf.

³⁰ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_AL-TOU.pdf.

- Schedule AY-TOU, General Service – Time Metered Optional (Closed Schedule after 9/2/1999):³¹ optionally available to all metered non-residential customers who request service on this schedule and whose maximum annual demand does not exceed 500 kW.
- Schedule A6-TOU, General Service – Time Metered Optional:³² optionally available to customers receiving service at Primary, Primary Substation, or Transmission service voltage level, as defined in Rule 1, whose maximum demand in any time period is 500 kW or greater.
- Schedule DG-R, Distributed Generation Renewable – Time Metered:³³ optionally available to all metered non-residential customers whose peak annual load is equal to or less than 2 MW, and who have operational distributed generation, and the capacity of that operational distributed generation is equal to or greater than 10% of their peak annual load.
- Schedule OL-TOU, Outdoor Lighting – Time Metered:³⁴ applicable to metered outdoor sports and recreation area lighting load, not including street or highway lighting, controlled exclusively for nighttime operation. Incidental, non-outdoor area lighting load shall be served under this schedule if the incidental load meets the following conditions: 1) does not exceed 15 percent of the customer's maximum monthly demand; and 2) does not exceed 20 kW, regardless of the time such incidental load operates. Service under this schedule is not applicable to any customer whose monthly maximum demand is less than 20 kW and to any customer whose incidental load causes a summer on-peak demand that equals, exceeds, or is expected to equal or exceed 20 kW for three consecutive billing periods.

³¹ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_AY-TOU.pdf.

³² http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_A6-TOU.pdf.

³³ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_DG-R.pdf.

³⁴ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_DL-TOU.pdf.

1 Currently all of the above M/L C&I rate schedules are TOU rates with the exclusion of
2 Schedule AD. In addition, large customers³⁵ are currently subject to CPP-D, pursuant to D.08-
3 02-034. Medium customers³⁶ are anticipated to also default to CPP-D in 2015. Consistent with
4 D.14-01-002 in SDG&E's 2012 GRC P2, when M/L C&I customers default to CPP-D, there will
5 no longer be a flat rate opt-out for these customers. With the proposed changes to TOU periods,
6 SDG&E proposes to delay the default to CPP-D for Medium customers until November 2015,
7 after the summer months.³⁷ In addition, SDG&E proposes mandatory TOU for M/L C&I
8 customers effective November 2015, specifically the commodity portion of Schedule AD will
9 now have a TOU energy with peak demand charge structure.³⁸

10 **B. Agricultural**

11 SDG&E's rate schedules available to Agricultural customers are as follows:

- 12 • Schedule PA, Power – Agricultural:³⁹ This schedule is applicable to customers
13 whose monthly maximum demand does not exceed 500 kW for three consecutive
14 months for general power service utilized to pump water, or in the production of
15 agricultural products but excluding power service used for the processing of
16 agricultural products, general or protective lighting, or domestic household uses.
- 17 • Schedule PA-T-1, Experimental Power - Agricultural - Optional Time-Of-Use:⁴⁰
18 Optionally available, on an experimental basis, to agricultural and water pumping
19 customers whose maximum monthly demand is expected to be above 500 kW and
20 who are classified with one or more of the North American Industry Classification
21 ("NAICS") Codes identified in the tariff. Schedule PAT1 was previously part of

³⁵ For SDG&E, large customers are generally defined as customers greater than 200 kW.

³⁶ For SDG&E, medium customers are generally defined as customers between 20 and 200 kW.

³⁷ Default would continue to be subject to existing technology and customer information requirements.

³⁸ Expanded CARE customers are excluded as discussed above.

³⁹ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_PA.pdf.

⁴⁰ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_PA-T-1.pdf.

1 the M/L C&I class. Customers on Schedule PAT1 will be moved to the
2 Agricultural class with the implementation SDG&E's 2012 GRC P2 pursuant to
3 D.14-01-002.

4 Currently Schedule PA has a seasonal flat rate with basic service fee structure.
5 Consistent with the treatment of M/L C&I customers discussed above, with the implementation
6 of D.14-01-002 in SDG&E's 2012 GRC P2, when Schedule PA customers with a demand
7 greater than 20kW default to CPP-D, there will no longer be a flat rate opt-out for these
8 customers. To date, there are customers that have defaulted to CPP-D and opted-out to the
9 existing flat rate. Consistent with the treatment of M/L C&I customers identified above, with the
10 proposed changes to TOU periods, SDG&E proposes to delay the default to medium agricultural
11 customers (customers with demand 20-200 kW) until November 2015, after the summer
12 months.⁴¹ OP 4 of D.12-12-004 specifies that "(f)lat rates will no longer be available to small
13 non-residential customers after November 2014." With the change in TOU periods, SDG&E is
14 requesting that mandatory TOU for small non-residential customers, including Schedule PA
15 customers less than 20 kW, be effective November 2015. In addition, SDG&E proposes
16 mandatory TOU for all agricultural customers effective November 2015.⁴²

17 Schedule PA-T-1 includes four optional TOU periods for summer on-peak demand
18 charges. Energy TOU periods and winter on-peak demand periods are defined consistent with
19 other M/L C&I schedules and would change to remain consistent with all other TOU rates
20 schedules under SDG&E's TOU proposal. In addition, SDG&E proposes to move the summer
21 peak demand period definitions for the four peak demand options to align and be contained
22 within the new summer on-peak period of 2 p.m. to 9 p.m. Table CF-6 below identifies the

⁴¹ Default would continue to be subject to existing technology and customer information requirements.

⁴² Expanded CARE customers are excluded as discussed above.

1 present and proposed demand for PA-T-1. The semi-peak period definition for demand would
2 continue to be defined as all other hours excluding on-peak and super off-peak for demand.

3 **Table CF-6: Present and Proposed Summer On-Peak Demand Periods**
4 **For Schedule PA-T-1 Options**

	<i>Current</i>	<i>Proposed</i>
Option C	12 noon to 4 p.m.	2 p.m. to 5 p.m.
Option D	1 p.m. to 3 p.m.	4 p.m. to 7 p.m.
Option E	1 p.m. to 4 p.m.	6 p.m. to 9 p.m.
Option F	11 a.m. to 6 p.m.	2 p.m. to 9 p.m.

C. Small Commercial

SDG&E's rate schedules available to small commercial customers are as follows:⁴³

- Schedule A, General Service:⁴⁴ applicable to general service of non-residential customers with demand less than 20 kW for 12 consecutive months, including lighting, appliances, heating, and power, or any combination thereof, including common use. This is the standard rate schedule for small commercial customers.
- Schedule A-TOU, General Service – Time Metered Optional (Closed Schedule after 10/1/2002):⁴⁵ optionally available to customers receiving general service including lighting, appliances, heating, and power, or any combination thereof, including common use and not applicable to any customer whose monthly maximum demand equals, exceeds, or is expected to equal or exceed 40 kW for three consecutive months.

⁴³ In addition, Schedule A-TC, *Traffic Control Service*, applicable to local, state or other governmental agencies for service to traffic signal systems utilized 24 hours per day, located on streets, highways or other public thoroughfares, is part of SDG&E's small commercial customer class. The requirements for mandatory TOU pursuant to D.12-12-004 discussed below do not apply.

⁴⁴ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_A.pdf.

⁴⁵ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_A-TOU.pdf.

1 D.12-12-004 specifies that “(f)lat rates will no longer be available to small non-
2 residential customers after November 2014.”⁴⁶ In addition, D.12-12-004 permitted
3 implementation on a rolling basis over a six-month period, more specifically, “to adopt a six-
4 month rolling implementation period for default tariffs.”⁴⁷ With the change in TOU periods,
5 SDG&E is requesting that mandatory TOU for small non-residential be effective November
6 2015.

7 **D. Residential**

8 SDG&E’s current rate schedules available for its Residential customers are as follows:

- 9
- 10 • Schedule DR, Residential Service:⁴⁸ SDG&E’s standard residential rate applicable to
11 domestic service for lighting, heating, cooking, water heating, and power, or
12 combination thereof, in single family dwellings, flats, and apartments, separately
13 metered by the utility. This is the standard rate schedule for Residential customers
14 and has a 4-tiered rate structure. Additionally, SDG&E has the following tiered rate
15 schedules:

- 16 ○ Schedule DM, Multi-Family Service (Closed Schedule):⁴⁹ applicable to
17 residential service for multi-family accommodations through one meter on a
18 single premise in accordance with the provisions of Rule 19.
- 19 ○ Schedule DS, Submetered Multi-Family Service:⁵⁰ applicable to residential
20 service for multi-family accommodations other than in a mobile home park

⁴⁶ D.12-12-004, OP 4.

⁴⁷ D.12-12-004, p. 64 and OP 7.

⁴⁸ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_DR.pdf.

⁴⁹ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_DM.pdf.

⁵⁰ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_DS.pdf.

1 through one meter on a single premises and submetered to all individual
2 tenants in accordance with the provisions of Rule 19.

- 3 ○ Schedule DT, Submetered Multi-Family Service – Mobile Home Park (Closed
4 Schedule).⁵¹ applicable to residential service for multi-family
5 accommodations in a mobile home park through one meter on a single
6 premises and submetered to all individual tenants in accordance with the
7 provisions of Rule 19.
- 8 ○ Schedule DT-RV, Submetered Service – Recreational Vehicle Parks and
9 Residential Marinas.⁵² applicable to residential service for qualifying residents
10 of recreational vehicle (“RV”) parks and residential marinas through one
11 meter on a single premises and submetered to all RV park and residential
12 marina tenants in accordance with the provisions of Rule 19.
- 13 ● Schedule DR-TOU, Experimental Domestic Time-Of-Use Service:⁵³ optionally
14 available to domestic service for single family dwellings, flats, and apartments where
15 the customer is separately metered by the utility. This schedule is a tiered TOU rate
16 schedule.
- 17 ● Schedule DR-SES, Domestic Time-Of-Use For Households With A Solar Energy
18 System:⁵⁴ optionally available on a voluntary basis for individually metered
19 residential customers with Solar Energy Systems.
- 20 ● Schedule EV-TOU, Electric Time-Of-Use For Electric Vehicle Charging⁵⁵: optionally
21 available for separately metered residential charging of an EV. Additional, SDG&E

⁵¹ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_DT.pdf.

⁵² http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_DT-RV.pdf.

⁵³ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_DR-TOU.pdf.

⁵⁴ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_DR-SES.pdf.

⁵⁵ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_EV-TOU.pdf.

1 has three experimental EV rates (Schedules EPEV-X, EPEV-Y, and EPEV-Z) with
2 differing TOU differentials.

- 3 • Schedule EV-TOU-2, Electric Time-Of-Use For Electric Vehicle Charging:⁵⁶
4 optionally available whole house rate for residential service and EV charging.

5 Currently the majority of residential customers are on a tiered rate schedule (e.g.,
6 Schedule DR) with some customers taking service on optional TOU rate schedules available to
7 residential customers. Upon implementation of SDG&E's proposal to change TOU periods, the
8 TOU periods will change for all residential TOU schedules.

9 Schedule DR-TOU is currently a tiered TOU rate with 2-TOU periods. With the
10 implementation of SDG&E's proposal to change the TOU periods, Schedule DR-TOU will have
11 3-TOU periods consistent with all other TOU rate schedules. In addition, SDG&E proposes the
12 following structural change to Schedule DR-TOU:

- 13 • Schedule DR-TOU will have TRAC tiered rates that will be equal to the respective
14 Schedule DR TRAC tiered rates such that each TOU period rate will have the same
15 TRAC rates by tier for all TOU resulting in rates that differ from the respective DR
16 schedule only due to differences in the TOU commodity rate.

17 In addition, D.12-12-004 implements new optional TOU rate and an optional dynamic
18 pricing rate for residential customers that will be implemented in 2014.⁵⁷ Upon implementation
19 of SDG&E's proposal to change TOU periods, the TOU periods will change for these schedules.

⁵⁶ http://regarchive.sdge.com/tm2/pdf/ELEC_ELEC-SCHEDS_EV-TOU-2.pdf.

⁵⁷ D.12-12-004, OP 5.

1 **V. REDUCING PTR INCENTIVES**

2 Under the Commission-approved⁵⁸ PTR program, customers receive bill credits for
3 reductions in energy consumption during PTR events (i.e., using less kWh during the event when
4 compared to the customer's normal usage pattern). In D.09-03-026, the Commission stated that
5 "... the PTR program should be regarded as a transitional program that the Commission intends
6 to review when the AB 1X rate protections change."⁵⁹ On January 6, 2014, the Commission
7 issued *Staff Proposal for Residential Rate Reform in Compliance with R.12-06-013 and AB 327*
8 ("Staff Proposal"). The Staff Proposal identifies the end-state for residential rate offerings to be
9 default TOU with optional CPP.⁶⁰

10 Pursuant to D.12-12-004, SDG&E will be implementing an optional CPP rate for
11 residential customers following the implementation of D.14-01-002 issued in SDG&E's 2012
12 GRC P2 proceeding (A.11-10-002), where the residential CPP rate design was proposed. With
13 the introduction of an optional CPP rate for residential customers, SDG&E proposes that the
14 PTR credit levels be reduced to transition customers from the less efficient PTR to the more
15 accurate CPP rate by making the CPP pricing more attractive to customers that can provide
16 demand response. Specifically, SDG&E is proposing to reduce the PTR incentive levels by
17 \$0.25 to \$0.50 or \$1.00 per kWh (depending on whether the customer is using enhanced
18 technology) effective November 1, 2015, to begin the transition from PTR to CPP for residential.

19 **VI. RECOVERY OF CSI AND SGIP COSTS**

20 In the Residential Rate OIR, one of the Principles set forth is "incentives should be
21 explicit and transparent (Principle 8)."⁶¹ Further, SDG&E defines an Optimal Rate Design as a
22 rate design where "incentives or subsidies that have been deemed necessary to further public

⁵⁸ The PTR program was adopted in D.08-02-034 and implemented in 2012.

⁵⁹ D.09-03-026, p. 121.

⁶⁰ Staff Proposal Page 19.

⁶¹ Scoping Memo issued November 26, 2012 in Residential Rate OIR, page 7.

1 policy objectives are separately and transparently identified and charged to customers in a fair
2 manner.”⁶²

3 Currently, the funding for public policy programs such as energy efficiency and low
4 income programs are recovered through the PPP rate. SDG&E’s distribution rates currently
5 recover the costs of SDG&E’s distribution system along with the costs of miscellaneous
6 programs adopted by the Commission and/or State Legislature such as SGIP and CSI. These
7 miscellaneous programs have separate class allocation treatment adopted by the Commission.
8 SDG&E proposes to recover the costs of these miscellaneous programs in PPP rates instead of
9 Distribution rates.

10 Attachment B presents proposed rates based on the recovery of these miscellaneous
11 program costs in PPP rates instead of Distribution rates. CSI is an incentive program overseen
12 by the Commission which provides cash back for installation of solar energy systems for existing
13 homes, as well as existing and new commercial, industrial, government, non-profit, and
14 agricultural properties. SGIP is also an incentive program overseen by the Commission and
15 provides financial awards for the installation of new qualifying technologies (e.g., renewable and
16 waste energy recovery technology, non-renewable conventional combined heat and power
17 (“CHP”) and renewable technologies such as advanced energy storage) that are installed to meet
18 all or a portion of the electric energy needs of a facility. Recovering these miscellaneous
19 program costs in PPP rates would provide customers with a better price signal by recovering
20 only SDG&E’s distribution costs in Distribution rates while recovery costs related to these
21 Commission/legislative adopted programs will be recovered in PPP rates. SDG&E is not
22 proposing to change the current cost responsibility and allocation treatment of these program

⁶² SDG&E Proposal filed May 29, 2013, in response to Ruling of Administrative Law Judge (“ALJ”) McKinney and the November 26, 2012 Scoping Memo and Ruling of Assigned Commissioner (“Scoping Memo”) in Residential Rate OIR, page 8.

1 costs and thus, there will be no rate impact from recovering these costs in PPP rates instead of
2 distribution rates.⁶³

3 **VII. SUMMARY AND CONCLUSION**

4 SDG&E recommends that the Commission adopt its proposals to:

- 5 • Reduce baseline levels to the legislative minimum levels with a 5-year transition
6 for customers with All-Electric service;
- 7 • Change TOU periods for all SDG&E rates schedules to one consistent set of on-
8 peak, semi-peak, and super off-peak periods;
- 9 • Implement mandatory TOU for all non-residential customers with timing
10 coordinated with the change in TOU period definition.
- 11 • Reduce PTR incentives by \$0.25 to \$0.50 or \$1.00 per kWh (depending on
12 whether the customer is using enhanced technology) effective November 1, 2015;
- 13 • Move recovery of CSI and SGIP costs from Distribution rates to PPP rates; and

14 This concludes my prepared direct testimony.

15
63 SDG&E is not proposing to recover SGIP and CSI program costs from Departing Load customers paying PPP as a
nonbypassable charge in this proceeding.

1 **VIII. WITNESS QUALIFICATIONS**

2 My name is Cynthia S. Fang and my business address is 8330 Century Park Court, San
3 Diego, California 92123. I am the Electric Rates Manager in the General Rate Case and
4 Revenue Requirements Department of San Diego Gas and Electric (SDG&E). My primary
5 responsibilities include the development of cost-of-service studies, determination of revenue
6 allocation and electric rate design methods, analysis of ratemaking theories, and preparation of
7 various regulatory filings. I began work at SDG&E in May 2006 as a Regulatory Economic
8 Advisor and have held positions of increasing responsibility in the Electric Rate Design group.
9 Prior to joining SDG&E, I was employed by the Minnesota Department of Commerce, Energy
10 Division, as a Public Utilities Rates Analyst from 2003 through May 2006.

11 In 1993, I graduated from the University of California at Berkeley with a Bachelor of
12 Science in Political Economics of Natural Resources. I also attended the University of
13 Minnesota where I completed all coursework required for a Ph.D. in Applied Economics.

14 I have previously submitted testimony before the Federal Energy Regulatory Commission
15 and have submitted testimony and testified before the California Public Utilities Commission
16 regarding SDG&E's electric rate design and other regulatory proceedings. In addition, I have
17 previously submitted testimony and testified before the Minnesota Public Utilities Commission
18 on numerous rate and policy issues applicable to the electric and natural gas utilities.

BASELINE STUDY
SAN DIEGO GAS AND ELECTRIC COMPANY – ELECTRIC DEPARTMENT
2015 RATE DESIGN WINDOW (RDW) FILING

A. Introduction

Baseline quantities are the designated daily amounts of electricity and gas that are considered necessary to supply a significant portion of the reasonable energy needs of the average residential customer. California Public Utilities Code Section 739(d)(1) requires that baseline quantities be set in a range of 50 to 60 percent of average residential consumption, except for all-electric customers, for whom the baseline is to be set in a range of 60 to 70 percent during the winter season. Using the Commission-adopted methodology, baselines quantities are to be updated periodically to reasonably reflect customer usage by climate zone, type of service and season¹. This attachment presents the results of SDG&E's most recent baseline study.

B. Baseline Methodology

To calculate baseline quantities SDG&E used the bill frequency methodology adopted by the Commission in D.83-12-065 and affirmed in D.02-04-026 and D.04-02-057. This methodology was applied to the most recent three years (2010-2012) of historical usage for Schedules DR, DR-LI and DR-TOU for each season, service type and climate zone in the SDG&E service territory. The baseline study also included an evaluation of the impact of seasonal homes on baseline quantities, and calculation of a separate set of baseline quantities for master-metered customers on Schedule DM.

1. Legislative Minimum Baseline Allowances

Tables G-1 and G-2 present the current and proposed baseline quantities based on the legislated minimum range: 50 percent of average usage for all customers except all-electric

¹ SDG&E currently has four climate zones (Coastal, Inland, Mountain and Desert), two service types (Basic and All-Electric) and two seasons (Winter: January through April and November through December, and Summer: May through October).

REVISED ATTACHMENT G

customers during the winter season which is 60 percent of average usage. The proposed baseline quantities for All-Electric customers are shown with equal annual adjustments over a five-year phase-in period.

Table G-1
San Diego Gas & Electric
Residential Baseline Quantities

Season	Service	Climate Zone	Current		Proposed			
			Baseline Quantity	Baseline Percentage	1st-year Baseline Quantity	1st-year Baseline Percentage	5th-year Baseline Quantity	5th-year Baseline Percentage

		kWh/day	kWh/day	kWh/day	kWh/day	kWh/day	kWh/day
Summer	Coastal	9.8	9.0	8.3	7.5	6.8	6.0
	Inland	11.0	10.6	10.1	9.6	9.2	8.7
	Mountain	17.3	16.9	16.5	16.0	15.6	15.2
	Desert	19.5	19.0	18.5	18.0	17.5	17.0
Winter	Coastal	16.6	15.0	13.5	11.9	10.4	8.8
	Inland	18.3	17.1	15.8	14.6	13.4	12.2
	Mountain	28.5	27.2	26.0	24.7	23.4	22.1
	Desert	22.0	21.0	20.0	19.1	18.1	17.1

2. Impact of Seasonal Residences

In the Baseline OIR (D.04-02-057, Ordering Paragraph 10), the commission directed SDG&E to determine if the exclusion of seasonal residences from baseline calculations would decrease baseline quantities by a 3 percent materiality threshold. This evaluation was performed for each climate zone type of electric service and season. Based on seasonal home percentages estimated from census tract data from the 2010 U.S. Census, SDG&E used the “PG&E proxy” method for excluding the usage of seasonal residences from baseline calculations. The proxy method excludes the set of bills with the lowest usage equivalent to the percentage of seasonal residences.

Table G-3 shows the percentage of seasonal homes and the change in baseline quantities if seasonal homes are excluded. The analysis indicates that the exclusion of seasonal homes had negligible effect with the exception of customers in the Desert climate zone. For customers in

2015 RATE DESIGN WINDOW (RDW) FILING

the Desert climate zone, the change in baseline quantities exceeded the 3 percent materiality threshold for each season and type of service. Therefore, Desert baseline quantities were adjusted upward accordingly to reflect the exclusion of seasonal homes.

Table G-3
San Diego Gas & Electric
Impact of Excluding Seasonal Residences on Baseline Quantities

Season	Service Type	Climate Zone	Percentage of Seasonal Homes	% Change in Baseline Quantities with Seasonal Homes Excluded
Summer	Basic	Coastal	2.5%	0.0%
		Inland	0.6%	0.0%
		Mountain	9.1%	0.2%
		Desert	36.5%	9.1%*
	All-Electric	Coastal	2.6%	0.0%
		Inland	0.6%	0.0%
		Mountain	10.0%	0.9%
		Desert	38.4%	12%*
Winter	Basic	Coastal	2.5%	0.0%
		Inland	0.6%	0.0%
		Mountain	9.1%	0.0%
		Desert	36.5%	12.1%*
	All-Electric	Coastal	2.6%	0.0%
		Inland	0.6%	0.0%
		Mountain	10.0%	0.4%
		Desert	38.4%	11.8%*

* Exceeds 3% materiality threshold

3. Schedule DM Baseline Quantities

SDG&E developed a separate set of baseline quantities for Schedule DM, a closed schedule that is applicable to master-metered multi-family units which are not sub-metered. Proposed baseline quantities for Schedule DM were calculated by adjusting the baseline

2015 RATE DESIGN WINDOW (RDW) FILING

quantities for individually-metered residential customers for each climate zone and season by the proportion of the average use of Schedule DM to the average use of the individually-metered group for each season. Table G-4 displays proposed quantities for the initial year (and the subsequent years of the five-year phase-in for all-electric customers.)

Table G-4
San Diego Gas & Electric
Master-Metered (Schedule DM) Baseline Quantities
With Five-year Phase-in for All-Electric Customers

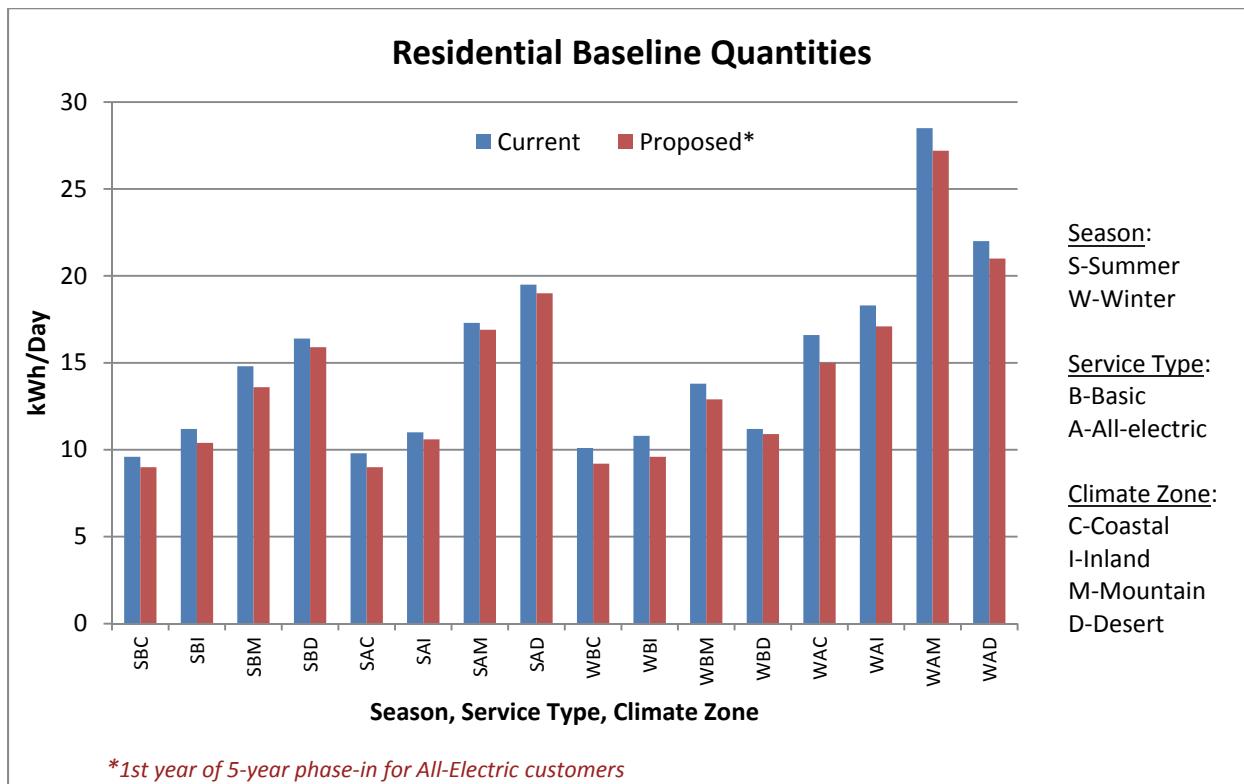

Season	Service Type	Climate Zone	Current Baseline Quantity	Proposed Master-metered Baseline				
				1st-year	2nd-year	3rd-year	4th-year	5th-year
			kWh/day	kWh/day	kWh/day	kWh/day	kWh/day	kWh/day
Summer	Basic	Coastal	5.5	4.5	Same as first year			
		Inland	6.4	5.2				
		Mountain	8.4	6.8				
		Desert	13.8	10.4				
	All-Electric	Coastal	7.3	4.5	4.2	3.8	3.4	3.0
		Inland	7.3	5.3	5.1	4.9	4.6	4.4
		Mountain	10.6	8.5	8.3	8.1	7.9	7.6
		Desert	15.9	12.4	12.1	11.8	11.4	11.1
Winter	Basic	Coastal	5.8	5.1	Same as first year			
		Inland	6.2	5.4				
		Mountain	7.9	7.2				
		Desert	6.4	6.9				
	All-Electric	Coastal	11.6	8.4	7.5	6.6	5.8	4.9
		Inland	11.6	9.5	8.8	8.2	7.5	6.8
		Mountain	17.4	15.2	14.5	13.8	13.1	12.4
		Desert	14.8	13.3	12.7	12.1	11.4	10.8

C. Summary

In developing the proposed baselines, SDG&E used the Commission-directed bill frequency methodology and applied it to the updated data. A comparison of current and proposed quantities is shown graphically in Figure G-1.
